CETEC COLLECTION

## *Maison Pagode*

*Maison Pagode, a hidden Asian treasure in Paris. This Asian architecture is in the form of a Chinese pagoda rising over four floors, with gracefully curved eaves covered with glazed tiles; its brick-red facade contrasting with the freestone of the Haussmann buildings that surround it; its precious wooden portal on the roof of which are perched mysterious creatures whose silhouettes evoke a fish, a bird or a horse: everything is intriguing in the building located in the central part of the city.*

*Passionate by art & architecture, I was sure the discovery of this hidden treasure was not a coincidence but the starting point of our collection concept which will reflect this elegant Asiatic influences architecture in Paris.*

Vendôme

Parc Monceau

## PARC MONCEAU

Parc Monceau attests to the new nature harmonies of Cetec: modern and delicate.

Worked in a shade of degrade, the colours of the details are inspired by the landscape. The aqua & purple tones remind us the freshness of the sunrise; the golden & warm pink shades call to mind the beauty of the sunset; the green tones remind us the area of the meadow.

## LILI

On a cotton base, our beautiful Lili cut pinned velvet unfolds its irregular, infinite leaves & lily's flowers. The designs which appear to be in motion, seem to be balanced on this mirror surface. The relief effect is studded with small uncut piles which underline the design and give the fabric all its character and uniqueness.

Peninsula

Crillon

Vendôme

## PENINSULA

Peninsula is homage to the superb architecture of the Parisian Palace. We have interpreted its characteristic geometrical style with a cross design.

To imbue this jacquard with the subtlety of its inspiration, we have painstakingly selected a fine & dense satin warp which contrasts with a slubbed matt cotton weft to weave the design. This combination turns Peninsula into a fabric with a contemporary look that will lend a touch of the sublime to any interior.

Crillon is a woven structure that combines technical performance with contemporary elegance. Its structure plays with our eyes. Its intricate armoring work and mélange yarn colors give the illusion of the pixel and create a 3D effect. It lends itself to the realization of furniture in the most exclusive places. Thanks to its technical performance, Crillon ensures resistance to abrasion and light, as well as easy care. Its thick chain is framed with two fancy threads of different colors which gives this jacquard its entire depth and uniqueness color pallet.

Parc Monceau

Crillon

## PLAZA ATHENÉE

A woven texture with geometric and tight armor, which plays with subtle matte and shiny effects. The diversity of yarns such as soft chenille combined with more satiny fibers suggests a refined and precious character. Thick and durable, the Plaza Athenée texture is ideal for making your seats for intensive use.

## CHAMPS-ELYSEE

Champs-Elysée pays tribute to the art of embroidery know-how and the poetry of natural materials. The vertical stripes are embroidered with a fine wool whom the softness reminds us a cashmere scarf; the delicate ground is woven as a net and the piece-dyeing lets appear delicate nuances thank to the yarn mélangé. The contrast from the mat stripes & the shine from the ground testify the Cetec delicate taste for the combination of materials & delicate fines textures.

LOTUS

LOTUS is inspired by the traditional Shantung silk. Woven by respecting the traditional statement, Shantung is considered like a "wild silk", it has a textured aspect thank to the slubbed woven yarns from the weft which design a delicate structure on the surface.

## VENDÔME

Haute-Couture inspiration for Vendôme. The fabric is woven by a wooden loom using the traditional know-how. It combines fancy yarns and colours with the boldness of the greatest Parisian designers.

The exclusivity of these weaves comes from the richness and dyeing of the yarns that compose them. Vendôme is made up of three unusual fancy yarns, spun by hand: one ribbon, one bouclé yarn and one cotton thread with sequins. Each one is space-dyed in two or three colours, turning Vendôme into a uniquely hued fabric.

The 6 colours pay homage to the feminine nuances of Mademoiselle Chanel ribbon.

PALAIS ROYAL

Palais Royal captivates with its elegant look. A thick weft is woven on a delicate organza ground to create thin stripes with various contrasts of tones. Woven in double width; it is - without any doubt - at the window that Palais Royal reveals its unique character thanks to the varying transparency of the stripes.

MEURICE

Meurice is a fabric woven from bouclé yarns. Its thick warp provides a resistant base, while in the weft, its looped thread, married to a second thread, gives softness and relief to the downy fabric. Meurice fabric is ideal for making comfortable upholstery, head-bed and cushions for interior designer in love with texture.
