ADO RE FABRICS MADE OF RECYCLED MATERIALS

**SUSTAINABLE WITH
THE LOOKS TO MATCH**

OUR VISION: ADO FABRICS ARE GOING GREEN

Our long-term goal is to make our product line out of 100 per cent recycled materials. That means transforming waste into new resources, not the other way around. To come one step closer to achieving this goal, we, together with our manufacturers, developed this first sustainable collection which contains between 39 and 63 per cent recycled polyester.

100 % PES, including 50 % recycled PES

REMUS RE

New look. Same fabric. As a well-balanced complement to **REMO**, the **REMUS** design additionally features wide stripes in three colours in a modern look. The exquisite sheer fabric, which comes in five opulent colours, is ideal in combination with **REMO**.

RELUS RE

The base design of **RELUS** will make a wonderful, nature-inspired addition to your home thanks to the artful flowers and grass featured on the fabric. It also boasts another eye-catching feature, namely the striking colour gradient on the top of the fabric which gradually softens as your eye moves down. Another appealing feature is the glittery, gauze-like texture of the 63 per cent recycled polyester fabric, which creates lots of light and atmosphere.

ADO RE AT A GLANCE

NAME	ITEM NO.	MATERIAL	FABRIC WIDTH	COLOURS	BRIEF INFO
REVIN RE	8009	100 % PES, including 39 % recycled PES	300 cm	3	Sheer fabric, print, floral design, room-height, weight tape

REVIN RE

REVIN draws your eyes into a misty, mystical forest. Its floral, Scandinavian-style print enhances the three-dimensionality of the vibrant REVAL base fabric. An interplay of thick branches and delicate shadows create a wonderful sense of depth that draws you in. Inspired by nature, REVIN 39 per cent recycled material to contribute to a more sustainable use of resources.

100 % PES, including 39 % recycled PES

REVAL RE

REVAL is defined by a natural, vibrant, rough-hewn look with an organically soft texture and a natural linen feel in a handwoven crochet appearance. It's the perfect base fabric for the enchanting REVIN pattern.

HOW CAN SYNTHETIC FIBRE BE SUSTAINABLE?

Although more energy may be used in the production of synthetic fibres, they require considerably less water and dyes to make. Also, synthetic material is not a natural product. This reduces water and pesticide use while freeing up agricultural land for other purposes.

Its most appealing feature, however, is its durability, as the synthetic fibres possess exceptional light and colour fastness. The fabrics therefore retain colour intensity for longer, even after being exposed to intense UV light by the window. The colour also bonds more closely with the fibre, and the fabric can be washed more often without fading. In short, you'll be able to enjoy your curtains longer.

RELON RE

Helping to improve your nature-life balance: **RELON**. It is the perfect complement to **RELUS**. Combine the two to create an atmosphere of calm tranquillity. Even on its own, the gauze-like, single-coloured fabric made of 63 per cent recycled polyester creates a calm, relaxing atmosphere in your home. It's cosy, easy to care for and sustainable.

SUSTAINABLE PRODUCT CARE

Curtains do not have to be washed as regularly as one might think or in very hot water. For the most part, washing them in the short cycle at no more than 30°C is sufficient to achieve the desired level of cleaning. Not using the spin cycle at all or only using a gentle spin cycle saves energy and preserves the integrity of the fibre. To avoid releasing microplastics, be sure to remove hooks and other parts attached to the curtain before washing and place it in a microplastic-proof bag during the wash cycle.

100 % PES, including 50 % recycled PES

REMO RE

REMO – the all-rounder. With its uniform texture, the attractive single-coloured fabric is perfect for those who prefer a more understated look. Sixteen additional vibrant colours are also available for those who would like to add a touch of boldness. Choose your favourite colour tone and add the finishing touch to your interior with this 50 per cent recycled polyester fabric that boasts an exquisitely soft texture and an elegant drape.

ADO RE AT A GLANCE

- _ Save on energy, water and CO₂
- _ Protects the environment by transforming plastic waste into textiles
- _ Timeless design and exceptional light and colour fastness
so that you can enjoy your curtains for a long time to come
- _ Recyclability
- _ No compromising on quality
